

YOUTH CREATES YOUTH-STRATEGY

CITY OF VIENNA, WERKSTADT JUNGES WIEN
VIENNA, AUSTRIA

IMPACTFUL PARTICIPATION

Listening to children, and considering their opinion in all matters that affect them **promotes commitment, makes them aware of their own responsibility** and that of others, and provides them with political education. It also increases identification with schools, parks, youth centres, districts and cities.

BASIS FOR YOUTH STRATEGY

The inputs of more than **22,000 children and young people** are being analysed by scientists. 24 groups have been chosen by lottery to send a representative to discuss and prioritise these results. The commonly developed topics build the basis of the Children and Youth Strategy of the City of Vienna.

FAMILIAR PLACES

In workshops, young people between the ages of 3–19 worked on **questions about their lives in the city and their future**. To involve young people from all backgrounds, they were held in nurseries, after-school care centres and schools, in youth centres, in parks, etc. by all kinds of caregivers.
